Patented single-feed strap prevents bag waste.

Bags contain totally degradable plastic additives.

The Gladiator Pet Waste Station

The Gladiator is the top of the line Pet Waste Station in the industry. The Gladiator's chute lid system is cleverly designed and allows users to easily and cleanly discard of their pet's waste. It also prevents unauthorized access, disposal of larger trash items such as pizza boxes. The bin has no plastic parts and its heavy construction makes it vandal resistant.

The Gladiator bin is constructed from heavy gauge Zintec steel and then powder coated. The bin is extremely durable and weather resistant. It also offers some very unique features such as a drop down front making emptying of the waste an easier task. The galvanized steel inner liner has a capacity of over 11 gallons.

Other features include an easy mount galvanized post, a flanged lid to prevent forceful entry and heavy gauge sign.
